

Our environmental work

Sustainable moving services In 2003 we made a strategic decision to make environmental issues a top priority within AQM. We have taken a lot of steps to improve our environmental performance since then, and today I am proud to say we have a widespread commitment to environmental work in our company. Climate change, of course, is our main concern given recent years global debate on climate change and transports. The key to success for our environmental work is cooperation with our customers and suppliers, and we are glad to say most of them share our concern for the environment. The AQM journey towards sustainable moving services has just begun; nevertheless we have taken important steps in the right direction both for the future of our business and for the future of the environment.

Kenneth Egelrud, CEO Alfa Quality Moving

Comprehensive environmental objectivesThe comprehensive environmental objectives of Alfa Quality Moving AB are the following:

- CO₂-emissions/m³ per goods volume, concerning european removals, shall be reduced by 2011 with 10% compared to 2008.
- By 2011, 75 % of our permanent transporters shall reach green level in our supplier assessment.

In addition to our comprehensive environmental objectives we also work on improvements concerning complaints, environmental issues for agents, energy optimization and competence development.
